

Mobile Software Engineer

Mehmet Alp Taser

info@mehmetalptaser.com +19497739119

SUMMARY

Product-focused Software Engineer with hands-on experience in both production banking systems and AI-powered mobile applications. Contributed to the development of large-scale mobile banking apps serving over 1M users, and built multiple end-to-end products integrating real-time AI, voice, and scalable backend systems. Strong in Swift, mobile architecture, and rapid product development, with a proven ability to take ownership, solve real-world problems, and deliver reliable, high-performance applications. Authorized to work in the U.S. and actively seeking to contribute to impactful, user-focused technology products.

EXPERIENCE

CO-FOUNDER - CTO | May 2025 — Oct 2025

MISU AI - Istanbul, Turkey

- Led the end-to-end development of an AI-powered mobile application, from concept to production
- Designed and implemented the core system architecture, including mobile app structure and backend integration
- Integrated AI capabilities using modern APIs to enable intelligent user interactions
- Managed technical decisions across the product, balancing performance, scalability, and user experience
- Rapidly iterated on product features, testing multiple use cases and improving the

MOBILE ENGINEER | Dec 2021 — Nov 2022

Burgan Bank - Istanbul-Turkey

- Joined the mobile team during a critical transition period marked by high attrition and organizational instability
- Took ownership to help maintain continuity and delivery of core mobile banking applications
- Contributed to rebuilding team structure by supporting the return of a senior iOS engineer who later became team lead
- Collaborated with engineering leadership to identify delivery risks and maintain product quality in a regulated environment
- Acted as a quality-focused contributor by identifying performance issues and ensuring stable releases
- Contributed to the development and stabilization of mobile banking applications serving **1M+ users** (*ON Mobil, Burgan Mobil*)

X TECH | May 2021 — Dec 2021

Founder - CTO - Istanbul, Turkey

- Contributed to the development of early-stage mobile applications in a fast-paced startup environment during the COVID-19 period
- Built and improved iOS features with a focus on usability, performance, and rapid iteration
- Worked closely with a small team to prototype, test, and launch product features quickly
- Gained hands-on experience in agile development and startup product cycles
- Adapted quickly to changing requirements and contributed across multiple areas of the product

SOFTWARE TEAM MANAGER | Sep 2020 — Mar 2021

Reaction Enterprise - Istanbul, Turkey

Developed multiple mobile applications including **H-Talks**, **Migren Takibim**, and **DryClean Express**

Contributed to healthcare-focused applications, improving user experience and reliability in real-world usage scenarios

H-Talks

- Built a live-stream based mobile platform connecting doctors with pharmaceutical brands for educational and promotional sessions
- Focused on real-time user experience, content delivery, and interaction flows

Migren Takibim

- Developed a health tracking application enabling users to monitor migraine patterns and symptoms
- Designed user-friendly tracking flows to improve usability and engagement

DryClean Express

- Created a service-based mobile application for on-demand dry cleaning and logistics management
- Focused on simple UX and efficient service flow

EDUCATION

Bahcesehir University - Istanbul, Turkey | Software Engineering

| 2014 - 2022

Bay Atlantic University - Washington | Artificial Intelligence

| 2024 - 2027

(In Progress)

SKILLS

- Mobile App Development
- API Integration
- Agile Methodologies
- Cross-Platform Frameworks
- Jetpack Compose
- Firebase (Auth, Firestore)
- OpenAI API
- AI Chat Integration
- Swift & Kotlin
- UI/UX Optimization
- Continuous Integration
- UIKit
- MVVM Architecture
- REST APIs
- TTS/STT (Voice Systems)
